Press Release

Zimbra Email Archiving from Simply Mail Solutions

SMS is first hoster in the world to offer Zimbra Archiving.

Warrington, Tuesday, July 29th, 2008. Simply Mail Solutions, based in Warrington, Cheshire, UK has added the Archiving add-on for Zimbra CS to its range of hosted email products.

Archiving is increasingly being recognised as a vital component of corporate email systems by providing a verifiable long term store of a companies emails independent of any backups taken of users mail boxes. The product from Zimbra complements the existing email and collaboration suite.

Although quite a number of companies offer hosted versions of Zimbra CS (and SMS were one of the first in Europe) SMS is the first to offer the Archiving service to customers. Archiving will be available to users of the SMS shared Zimbra service – the service chosen by SME customers – and also to dedicated server customers.

Commented Colin Smith MD of SMS. “We see archiving of email as a vital service for users. They need confidence that there is any easy way of retrieving email no matter who in the organisation sent it and when. We plan to offer archiving for our MS Exchange users and will make an announcement shortly”
