

BlackBerry With MS Exchange

Hosted BlackBerry Enterprise Server is the ideal wireless solution for businesses that are already outsourcing or planning to outsource their email systems. This solution seamlessly integrates with your hosted corporate email and allows you to leverage the services your hosting provider offers to get your email wirelessly.

Hosted BlackBerry Enterprise Server offers the security and functionality of the BlackBerry Enterprise Solution through a fully outsourced version of BlackBerry Enterprise Server. You don't need to buy, install or manage server software. Your business can go wireless with no upfront software costs, deployment overhead or ongoing IT support costs.

For your business, this means you'll be able to maintain multiple channels of communication with your customers, increasing the immediacy of your responses and your ability to keep customers satisfied. Plus, you can purchase Hosted BlackBerry Enterprise Server through the partner that knows you best, Simply Mail Solutions

Why go wireless with Hosted BlackBerry Enterprise Server?

Get more from your budget and resources by using Hosted BlackBerry Enterprise Server to go wireless:

- Add secure BlackBerry mobility to your email and business applications now with an internet enabled Blackberry tariff from your mobile provider
- Focus on running your business instead of managing

technology

- Work smarter by improving communication between workers
- Make time away from your desk more productive and get more out of your day
- Get out of the office without being cut off from customers and colleagues
- Seamless integration with existing hosted email and business applications

All the BlackBerry Features You Need

Hosted BlackBerry Enterprise Server provides secure, wireless access to:

- Hosted Microsoft Exchange Phone
- Internet and intranet access
- Organizer applications – calendar, contacts, task list
- Business applications – contact management, inventory control, time and billing, bank transaction tracking, mileage managers, stock tickers and more
- Instant messaging
- SMS

And more...

SMS Common Features

All our email packages include:

- User management via our unique Control Panel
- Anti-spam and anti-virus filters
- Access via web browser
- Market leading storage per mailbox
- Own domain can be used regardless of service
- Instant setup

SMS Advanced Service Features

Infrastructure second to none:

- High Quality storage with NetApps—instant recovery from disk failure
- Virtualisation of servers—server downtime eliminated
- Dual data centres with fibre optic connection and multiple connections to the Internet

Dedicated servers are available for larger users—servers set up to your individual requirements and highly reliable as part of our Virtualisation Technology.
