

# sms NexGen email: the future of POP3 now!

## sms NexGen email

Fed up with the plain vanilla email services of your ISP? Then upgrade to our NexGen Email service.

It allows you to use your own domain and to have multiple mailboxes with the same domain and aliases. Lots of extra features including the best web interface on the market.

The service is based on the UNIX Zimbra OSS package.

Feature	SMS	ISP	Comments
Use of domain and aliases	Free	Extra charge	Customise your email address and make PIE!
Web Access	Best on the market!	Usually minimal	Very important for checking on the move

## SMS Common Features

All our email packages include:

- User management via our unique Control Panel
- Anti-spam and anti-virus filters
- Access via web browser
- Market leading storage per mailbox
- Same domain can be used regardless of service
- Instant setup

## SMS Advanced Service Features

Infrastructure second to none:

- High Quality storage with NetApps—instant recovery from disk failure
- Virtualisation of servers—server downtime eliminated
- Dual data centres with fibre optic connection and multiple connections to the Internet

**Dedicated servers** are available for larger users—servers set up to your individual requirements and highly reliable as part of our Virtualisation Technology.
