

# Microsoft Exchange email hosting

Microsoft Exchange Server (MSE) is a major player in the corporate market for mail servers. Now we can offer it to users without the hassle and complexity of installing and supporting it for both shared and dedicated servers. This makes the features of MSE available to small groups of users and for larger organisations removes a major burden for the IT department.

Choose from the 500MB Basic or Essentials package, the 2GB Classic package or the Executive package with UNLIMITED\* space.

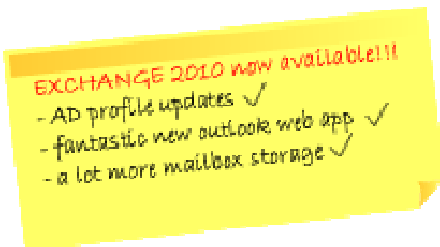

With our Classic and Executive packages we even **provide free copies of Microsoft Outlook** for Windows or Mac to each user so that you can make maximum use of MSE features.

However our hosted MS Exchange does much more than provide superior email services. It allows **collaborative working** by allowing other functions in MS Outlook such as scheduling meetings, sharing access of contact details and working together on tasks.

All these things can also be done using the **Web (OWA) wherever and whenever** you can get your hands on a pc connected to the Internet! With the latest improved MS Exchange version the web access also looks conveniently similar to the Outlook application on the desktop. And as new features are added by Microsoft we will make sure that you can use them without the hassle of updating and reconfiguring server software.

## SMS Exchange Features

- Log onto web access with your email address not just a number.
- Servers have their software updated as and when it is ready for production use.
- For dedicated servers you can add VPN technology for extra security

## SMS Common Features

All our email packages include:

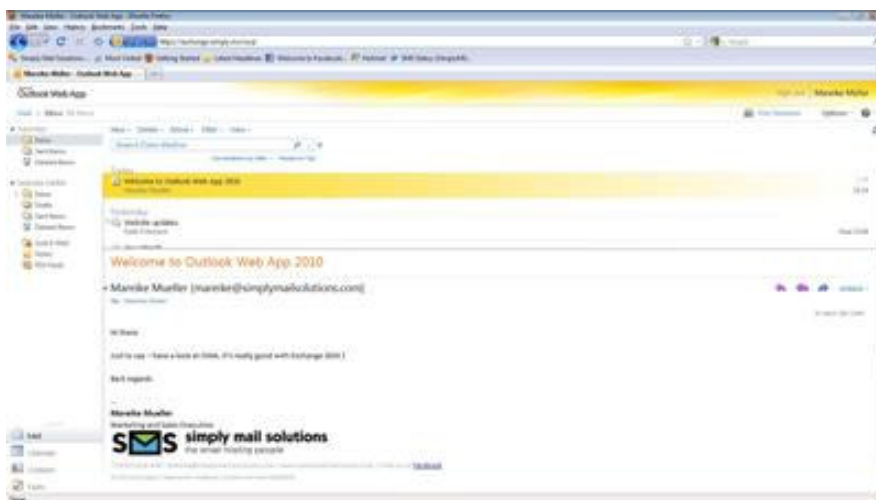

- User management via our unique Control Panel
- Anti-spam and anti-virus filters
- Access via web browser
- Market leading storage per mailbox
- Same domain can be used regardless of service
- Instant setup

## SMS Advanced Service Features

Infrastructure second to none:

- High Quality storage with NetApps—instant recovery from disk failure
- Virtualisation of servers—server downtime eliminated
- Dual data centres with fibre optic connection and multiple connections to the Internet

**Dedicated servers** are available for larger users—servers set up to your individual requirements and highly reliable as part of our Virtualisation Technology.

\*subject to fair usage policy

## A More Detailed Look

- Access by POP, IMAP, MAPI, SMTP and OWA
- Intelligent Message Filtering by server - you set it up
- Collaboration features including shared calendar, shared contacts, group scheduling, and shared folders
- Mobile work features such as Outlook Web App (OWA), Outlook Mobile Access
- Push email for mobile devices - email is sent to the device as soon as received giving mobile users access to the information they need when they are out of the office .
- For out of office working users can set up various options (e.g. forwarding email or out of office messages)
- Dynamic user list management for better management of internal email lists
- Nominate an Organisation Administrator for your company to manage all of your users' accounts.

## Black Berry BES

SMS are a BlackBerry Alliance partner and can offer Exchange email for use with BlackBerry Smartphones.

## SharePoint Services 3.0

MSE is also compatible with SharePoint allowing users on the go to access shared documents.

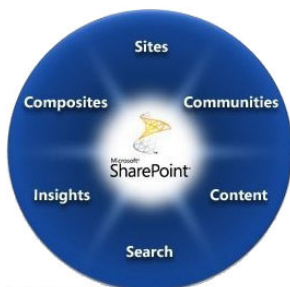

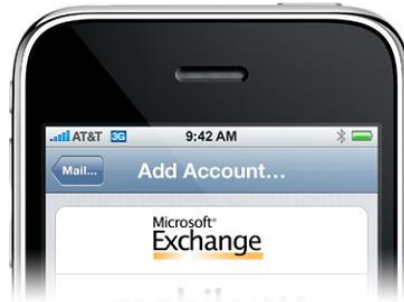

Image © Copyright Microsoft 2010

Gain from the opportunity to stay connected across organisational and geographical boundaries! For further information please ask us for our SharePoint brochure.

## Mobile Support

Support for Windows Mobile and Android devices includes remote access and synchronisation to email, calendar and tasks and global address list without extra servers. With the latest version you also get extra control of your Windows Mobile devices and for example can cancel the use of a mobile if it is stolen or goes missing.

Furthermore, the "Push" email feature of the iPhone is working reliably with our Exchange server service.

## Email Archiving

You can now add the archiving service to MS Exchange mailboxes. Profit from a secure storage solution that goes beyond the usual back-up as it secures email traffic separate from the users' own mail boxes. Contact our sales team on +44 1925 818 448 for more details.
